

BUSINESS GROWTH

Our passion for patient advocacy has a positive and direct impact on client company growth. This realization is what fuels our motivation and desire to set the bar even higher.

"[Elevated] asked me to give them 90 days and to free up a couple beds for insurance clients and they would prove that insurance is a viable source of payment. Despite our reluctance to go down this road again [with previous service], we took a leap of faith and now our treatment center is doing better than I ever imagined."

■ Mike J., Owner, Steps Recovery

"[Elevated] is very helpful, friendly, and we are seeing better results than we were able to get, (i.e. more days authorized & higher billing rates). Billing has improved; stress has been taken off the therapists having to talk with the insurance companies; reminders of reviews has helped a lot."

■ Leslie T., Lions Gate Recovery

"We were in process of orchestrating an upstart IOP and Elevated helped us put the pieces together. Staff is extremely helpful and helps in mitigating concerns. Additionally, we are reminded of any UR's that may be due for review and feel our backs are covered well."
